4. Electric Ovens

Multifunction Built-in oven

BS190 – STEAM ASSISTED

Steam Cooking Function
 In the steam cooking function, while the lower heater and turbo heater are working, the fan is running for easy distribution of the heated air. As in the image below, you should pour a maximum of 150 ml of water from the bottom of your oven or put it in a metal container and put it under the oven. Then you can start cooking your food by preheating for 5 minutes.

This function causes the food to rise more and the surfaces to brown more. In addition, it prevents the food from losing water during cooking and accelerates cooking. For optimal cooking, preheating should not be done for more than 5 minutes.

Features :

- Capacity: 61 litres
- Energy Class A
- Inner Walls with Easy to Clean Enamel
- Full Glass Inner Door
- Pop-in / Pop-out Control Buttons
- Inner Light
- Eco Function
- Full Touch Electronic Timer
